

De Dietrich

introduction

Setting New Values

As a Master of Innovations, De Dietrich is a brand that is always ahead of its time, constantly developing solutions for the future to enhance your lifestyle. Strong technological know-how, coupled with a heritage of more than 300 years of excellence and passion originating in France, have allowed De Dietrich to achieve today's internationally celebrated status.

New art of environmentally friendly living

As a market leader in Europe, De Dietrich is fully committed to the protection of the environment, particularly in the conservation of raw materials, water and electricity. And furthermore, De Dietrich cooking, washing and cooling appliances are A-Class energy efficient.

The power of innovation

Since the initial experimental launch of electronic ovens in 1977, various innovations have come to life, to reward investment made in research and development. De Dietrich, the inventor of the pyrolysis ovens, induction hobs and many other firsts, has constantly launched many developments throughout the range in washing, cooking and cooling: from steam ovens to bigger induction zones; development of ICS technology in cooking and dishwashing, gas hob with touch controls or the first colour matrices ovens in the market.

In line with its innovative vocation and its forefront position in domestic appliances design, De Dietrich always offers you the best.
